

AI for Intelligent Transformation – Executive Deep Dive Workshop

German University
of Digital Science

Unlock the potential of Artificial Intelligence to drive meaningful change in your organisation. Join a dynamic **one-day workshop** designed exclusively for **senior leaders, board members, and key decision-makers** ready to harness AI responsibly and strategically.

WHAT YOU'LL GAIN:

- Strategic insight into AI governance, AI Strategy, scalability, and emerging technologies
- Practical understanding of how tools like Gen AI can create value for your business
- Real-world applications across sectors including finance, energy, manufacturing, and services
- Leadership guidance to strategically embed AI into your business with purpose

HIGHLIGHTS INCLUDE:

- AI governance frameworks for responsible deployment
- Strategic priorities for creating value for your business with AI
- Interactive sessions to explore opportunities tailored to your context
- Peer learning, expert facilitation, and future-focused collaboration

Led by leading AI Expert Prof. Dr. Feiyu Xu (German UDS) and Patrick Bunk

Backed by deep expertise and enriched by peer dialogue, this workshop equips leaders with the knowledge and confidence to scale AI initiatives that matter.

Wherever you are in your AI journey—start, scale or steer—this workshop offers the insight and foresight to lead with impact.

Prof. Dr. Feiyu Xu

Dr. Feiyu Xu is a leading AI expert and board member of firms like Siemens Energy, Airbus and ZF. Her distinguished career includes top roles at SAP, Lenovo, and DFKI. Prof. Xu is recognised among the world's most influential women in AI.

Patrick Bunk

Experienced in Big Data and Applied AI, he has led pioneering ventures, such as Ubermetrics where he drove its AI-powered platform or UNICEPTA where he reshaped innovation. Bunk transforms cutting-edge AI research into market-ready solutions through collaborations with leading institutions and startups.
