

The digital transformation is omnipresent. It brings along numerous challenges that the education system has a central role to play in overcoming.

By founding the private and non-profit **German University of Digital Science (German UDS)** with headquarters in the media city of Babelsberg, we want to make a sustainable contribution and create an institution that

- ✓ works completely digitally and focuses on topics related to digitalization,
- ✓ makes high-quality university education on digital change accessible anywhere, at any time, and in a scalable manner,
- ✓ redefines global interdisciplinary research and
- ✓ realizes a flexible study routine with innovative teaching formats and modern learning platform technology.

Join our team as a **professor** for our study programs **M.Sc. Digital Leadership, M.Sc. Applied AI, M.Sc. Advanced Digital Reality, M.Sc. Cyber Security** and **MBA Digital Transformation** starting on October 1, 2024.

What we are looking for:

- You have completed a relevant university degree as well as a qualified doctorate and a habilitation or additional research/academic achievements as an equivalent.
- You have a passion for innovation, extensive experience in digital teaching and proven methodological and didactic skills.
- You have extensive experience in working with interdisciplinary (research) teams and in acquiring third-party funding.
- You show team spirit, have strong intercultural skills and are willing to actively participate in a dynamic, agile, and international team and play a key role in shaping the development of a new type of university.
- You are characterized by initiative, flexibility, "thinking out of the box", a passion for new technologies and the urge to break through traditional structures.
- We expect you to have an excellent command of English and be adept at using all digital tools.

The requirements for professors according to § 41 BbgHG is a Habilitation certificate or an expert opinion on habilitation-appropriate achievements.

What we offer:

- A completely new type of university that enables and promotes research, teaching, and exchange with researchers and students on a global level.
- State-of-the-art technical equipment and the opportunity to rethink and practice research and teaching in a virtual world.
- Flat hierarchies, an open university culture, and collaboration in a young, committed, and interdisciplinary team.
- Support for research projects and for didactic as well as academic development.
- A large international network of researchers and external partners as well as close cooperation with industry.
- A high degree of flexibility and the opportunity to be actively involved in the university's start-up phase and to contribute your own ideas for research and teaching.

If you are interested, please send your complete application until June 1, 2024 to presidium@german-uds.de. For further information see our website: [German-UDS.de](https://www.german-uds.de).
