

German University of Digital Science

We are looking for a

Professor (m/f/d)

ambitious in research and teaching in

**Big Data Technologies, Cloud Computing, XR Technologies
and Applied AI in our MBA, M.Sc. and B.Sc. study programs**

The German University of Digital Science (German UDS) is a digital university shaping a new era of learning and innovation. Our mission is to educate digital visionaries globally with our study programs. As a modern, agile company, we place particular emphasis on an open, diverse and inclusive corporate culture. We promote a balance of creativity, technology and human interaction - and are looking for people who share this vision with us.

What we are looking for

- You have completed a relevant university degree as well as a qualified doctorate and a habilitation or additional research/academic achievements as an equivalent.
- You have a passion for innovation, extensive experience in digital teaching and proven methodological and didactic skills.
- You have extensive experience in working with interdisciplinary (research) teams and in acquiring third-party funding.
- You show team spirit, have strong intercultural skills and are willing to actively participate in a dynamic, agile, and international team and play a key role in shaping the development of a new type of university.
- You are characterized by initiative, flexibility, „thinking out of the box“, a passion for new technologies and the urge to break through traditional structures.
- We expect you to have an excellent command of English and be adept at using all digital tools.

What we offer

- A completely new type of university that enables and promotes research, teaching, and exchange with researchers and students on a global level
- State-of-the-art technical equipment and the opportunity to rethink and practice research and teaching in a virtual world
- Flat hierarchies, an open university culture, and collaboration in a young, committed, and interdisciplinary team
- Support for research projects and for didactic as well as academic development
- A large international network of researchers and external partners as well as close cooperation with industry
- A high degree of flexibility and the opportunity to be actively involved in the university's start-up phase and to contribute your own ideas for research and teaching

The requirements for professors according to § 41 BbgHG is a Habilitation certificate or an expert opinion on habilitation-appropriate achievements

If you are interested, please send your complete application until 31st January 2025 to presidium@german-uds.de
